

## **Islamic Etiquette and Manner**

### **Introduction:**

Islamic etiquette and manners, known as "Adab," are fundamental aspects of a Muslim's daily life. These etiquettes cover various aspects, including social interactions, communication, cleanliness, and respect for others. In the modern era, many individuals lack awareness and understanding of these essential Islamic principles. This lack of knowledge can lead to misunderstandings, improper conduct, and a decline in moral values within communities.

To address this issue, we propose developing a console-based application that educates users on Islamic etiquette and manners. The application will serve as a digital guide, offering information on different aspects of Adab and providing interactive features to test users' knowledge. By leveraging technology, this solution aims to make Islamic teachings accessible and engaging for users of all ages.

### **Problem Statement:**

Many individuals, especially younger generations, lack proper knowledge of Islamic etiquette and manners due to limited access to structured resources. Traditional learning methods, such as books and oral teachings, may not be engaging or convenient for modern users. As a result, people may unknowingly engage in behaviors that contradict Islamic teachings, leading to misunderstandings and a weakening of moral values in society.

A structured, digital learning platform is needed to provide an interactive and user-friendly way to educate individuals on Islamic etiquette and manners. This console application will act as a self-learning tool, allowing users to gain insights into daily Islamic practices in a systematic and engaging manner.

### **Project Objectives:**

- Educate users on various aspects of Islamic etiquette and manners.
- Provide interactive learning through quizzes and scenario-based questions.
- Ensure accessibility through a lightweight, console-based application.
- Reinforce knowledge through a quiz system.

- Track user progress by saving quiz scores.

### Preliminary Solution:

To overcome the challenges identified in the problem statement, the following solutions are proposed:

Solution 1	Solution 2	Solution 3
Develop a console-based application that provides detailed explanations of Islamic etiquettes with categorized topics.	Implement a quiz system within the application to test users' understanding and reinforce learning.	Include a progress tracking system where users can view past quiz scores.

### Project Scopes:

The project will include the following functionalities:

Solution No	Functions	Features	Facilities
01	Categorized learning sections covering greetings, respect, and cleanliness.	Text-based guidance with examples from Islamic teachings.	Provides structured and easy-to-understand lessons.
02	Quiz module to reinforce learning.	Multiple-choice questions with instant feedback.	Helps users test their knowledge interactively.
03	Progress tracking system.	Stores and displays users' past quiz scores.	Encourages users to improve and track their learning journey.

### Conclusion:

Islamic etiquette and manners play a crucial role in shaping moral and ethical conduct in society. However, due to a lack of easily accessible resources, many individuals remain unaware of these fundamental teachings. By developing a console-based application, we aim to bridge

this gap and provide a structured, interactive, and user-friendly platform for learning Islamic manners. The proposed solutions will ensure that users not only gain theoretical knowledge but also have opportunities to reinforce and track their learning progress. This initiative will contribute to fostering a well-mannered and ethically responsible community.
